

WHAT IS NOTFOUND?

NotFound is a gaming experience that rewards you for your time. Players are shown a street-level photo of a real location somewhere in the world and must place a pin on a map to identify it. The more accurate the guess, the more \$NOTF tokens earned. Three games are free every day; extended play requires token entry, which is burned.

WHY IT WORKS

- Real game, real skill** — players engage because the game is fun, not just because of token rewards
- Deflationary mechanics** — every extra game played burns tokens; at scale, burns approach or exceed emissions
- Always-on content** — 12 Drops per day gives the account 12 daily content moments without needing a creative team
- Community-friendly tax structure** — 100% of sell tax returns to players, not team
- Low entry friction** — 0% buy tax and 3 free daily games make onboarding easy for non-crypto players
